ABOUT SOLIDARITES INTERNATIONAL

SOLIDARITES INTERNATIONAL (SI) is an international humanitarian aid organization that has been providing assistance to populations affected by armed conflict and natural disasters for over 40 years, meeting their basic needs for food, water, and shelter. Particularly committed to combating diseases linked to unsafe water, the leading cause of death worldwide, SI applies its expertise in the areas of access to drinking water, sanitation, and hygiene promotion, as well as in the essential areas of food security and livelihoods. Present in more than 20 countries, SI teams work with professionalism and commitment, respecting local cultures.

ABOUT THE MISSION

SOLIDARITES INTERNATIONAL (SI) is launching a **passive chlorination pilot project in Burkina Faso**, in partnership with **GiveWell**. This project aims to test and evaluate chlorination systems to improve access to safe water in areas with high infant mortality rates. It includes a **capacity-building component, rigorous monitoring and evaluation**, and capitalization of results with a view to scaling up.

OBJECTIVE OF THE CONSULTATION – DESCRIPTION OF THE MARKET

The consultant's mission is to provide coordination, technical and methodological support, and assistance to the team in charge of implementing the project. He or she must guarantee the quality and relevance of the project, while ensuring that the results are capitalized on.

Key Activities

The consultant will be responsible for:

- Monitoring and framing the strategic direction of the project, in collaboration with GiveWell and the implementation team.
- Advising the project team and Country Management on necessary strategic adjustments.
- Validating the relevance of diagnostics and technical approaches.
- Ensure compliance with SI and GiveWell technical requirements.
- Facilitate coordination between headquarters, the country office, and partners (Aquaya, Impact Water Work, Mangrove Water).
- Oversee the application of the monitoring and evaluation protocol with external partners.
- Provide technical support to the project team for the planning and implementation of activities.
- Centralize and disseminate project-related procedures, guides, and tools.
- Capitalize on innovative methodologies and results.
- Validate and consolidate technical reports.
- Organize training sessions as necessary.
- Ensure coordination/representation with GiveWell.

Expected Deliverables

The following deliverables are expected. The consultant may propose additional deliverables or substitutes for those proposed below.

Deliverable	Description
Detailed work plan	Validated document with timetable, budget, and distribution of roles.
Technical reports	Activity and indicator monitoring reports.
Evaluation reports	Consolidated reports with partners (Aquaya, IWW).
Capitalised guides and tools	Methodologies, best practices, and lessons learned.
Training reports	Reports on training provided to the project team

Practical arrangements

- Travel: Field missions possible in Burkina Faso (subject to administrative and security conditions).
- Duration: The project will last 18 months (start date scheduled for 1 February 2026). The consultant is expected to be available for an average of 5 to 10 days per month. Availability may vary depending on the phase of the project.
- Supervision: Under the responsibility of the WASH Unit Manager.

CONSULTATION TIMELINE

The project will last 18 months (scheduled start date: 1 February 2026). The consultant is expected to work an average of 5 to 10 days per month. The workload may vary depending on the phase of the project.

'PROFILE' REQUIREMENTS

- **Education:** Higher education degree (5 years of higher education) in the field of water and sanitation or public health.
- **Experience:**
 - Minimum 5 years in water, sanitation and hygiene project management in a humanitarian or development context, ideally with a strong technical component (related to drinking water supply – monitoring and analysis, water treatment, distribution, etc.).
 - Proven experience in multi-stakeholder coordination (NGOs, donors, local authorities).
 - Knowledge of issues relating to the analysis and monitoring of water quality and chlorination.
- **Languages:** Fluent **French and English** (spoken and written).
- In its relations with external consultants, SI gives preference to those who use an umbrella company service.

HOW TO APPLY

Interested candidates are invited to send:

- A detailed **CV**.
- An estimated **budget**.
- Two professional **references**.
